PROFESSIONAL SUMMARY

Full-Stack Software Engineer with hands-on experience building and maintaining production web applications end-to-end. Currently the sole developer behind Dentline Clinic's patient-facing platform, where I designed and shipped the entire system from scratch — including a custom SVG FDI dental chart, JWT-based auth with silent refresh and role-based routing, GDPR-compliant analytics, and mobile-optimized media delivery. Previously built the client-side experience at Crawdwall, a fintech platform connecting small businesses with grants and investors. Proficient in Next.js, React, TypeScript, Spring Boot, Node.js, and PostgreSQL, with a strong focus on clean architecture, transactional reliability, and user-centered design. Seeking a full-stack role where I can own features end-to-end and grow into system design.

TECHNICAL SKILLS

Frontend: React, Next.js, React Native, TypeScript, JavaScript, Tailwind CSS, Framer Motion, Material UI, HTML5, CSS3, Responsive Design, Accessibility (a11y)

Backend: Spring Boot, Node.js, Express, Django, Flask, RESTful API Design, JWT/OAuth Authentication, Microservices

Databases: PostgreSQL, MySQL, MongoDB, Firebase

DevOps & Tools: Docker, Git, GitHub, Vercel, Maven, Vite, Postman

Practices: Test-Driven Development (TDD), Object-Oriented Programming (OOP), Agile, Clean Code, API Integration

---

PROFESSIONAL EXPERIENCE

Dentline Clinic — Lagos, Nigeria
Web Developer | April 2025 – Present

- Sole developer responsible for designing, building, and maintaining the clinic's full-stack web platform from scratch, serving 200+ patients and processing 400+ appointments since launch.
- Built the frontend in Next.js and the backend in Spring Boot, implementing a secure JWT authentication system with silent token refresh, forced password-change flow, and role-based routing for patients, staff, and admins.
- Engineered a custom SVG FDI tooth chart from scratch (no third-party dental library) to support accurate, interactive dental charting — demonstrating ability to build domain-specific UI without external dependencies.
- Integrated GDPR-compliant analytics with consent gating, ensuring user data is only tracked after explicit opt-in.
- Optimized Cloudinary media delivery specifically for Nigerian mobile networks, reducing image payload and improving load times on low-bandwidth connections.
- Designed and deployed asynchronous notification workflows (seat availability, booking confirmations) that fire only after successful transaction commit — preventing race conditions and duplicate alerts.

Tech Stack: Next.js, React, TypeScript, Tailwind CSS, Spring Boot, Java, PostgreSQL, JWT, Cloudinary, Docker

Crawdwall — Remote
Frontend Developer | December 2025 – February 2026

- Built the entire client-side experience for a fintech platform connecting small business owners with grants while paying investors monthly returns.
- Developed responsive, component-driven interfaces in Next.js and Tailwind CSS, focused on clarity of financial information and investor trust.
- Collaborated with backend engineers to integrate REST APIs for business onboarding, investment tracking, and grant application flows.
- Project was paused due to funding, but shipped a fully functional client-side product during the engagement.

Tech Stack: Next.js, React, TypeScript, Tailwind CSS, REST APIs

PROJECTS

Dentline Clinic Management Platform — Production Live
https://www.dentlineclinic.com/

- Full-stack clinic operations system supporting patient management, appointment scheduling, billing, audit logging, admin dashboards, and a specialized Pilates program with credit-based session booking.
- Enforced a 48-hour cancellation policy, prevented no-show abuse, and used row-level locking to protect against overselling and duplicate credit usage.
- Stack: Spring Boot · PostgreSQL · Next.js · JWT · Docker

CreditWise Nigeria — Live Demo: https://frontend-credit-wise.vercel.app/

- Financial education platform helping Nigerians improve credit scores through personalized plans, progress tracking, expert consultation, and educational content.
- Stack: TypeScript · React · Tailwind CSS · Node.js · Express · MongoDB · JWT

Netflix Clone — Live Demo :https://netflix-clone-peach-five-67.vercel.app/login

- Streaming platform replica with user authentication, movie browsing, video playback, and responsive design powered by the TMDB API.
- Stack: React · Vite · Firebase · React Router · TMDB API

- E-Commerce Platform — [Live Demo](https://e-commerce-coral-beta-84.vercel.app/)
- Online shopping application with authentication, cart, checkout, order history, product reviews, and user profiles.
- Stack: React · Firebase · React Router

EDUCATION

- Semicolon Africa — Lagos, Nigeria
- Software Engineering Program | 2024 – 2025

  Intensive, project-based training in full-stack development, algorithms, system design, TDD, and Agile methodologies.
- Lagos State University --- Lagos, Nigeria
- B.Sc. Transport Planning and Policy | 2018 – 2023

ADDITIONAL INFORMATION

- Languages: English (fluent)
- Interests: Backend system design, concurrency-safe workflows, applying machine learning to real-world business problems
- Open to: Full-stack roles (remote or hybrid)
